

Climex, the exchange for environmental commodities and energy contracting

Your partner in carbon emission trading

Climex is the exchange for environmental commodities and energy contracting. It facilitates trading in carbon emission credits by offering a user-friendly, reliable and secure online exchange. Climex provides cleared EUA and CER Spot Trading and also stimulates the CDM and Voluntary market by organising regular CER/VER Auctions, offering customers the full range of compliance instruments. Next to this Climex supports Energy Contracting and Auctioning. Companies from all over the world - whether large or small - have easy access to a global pool of liquidity. Through Climex participants have access to more participants, more trades, more liquidity and transparent price discovery, which benefits all involved.

Climex Spot Platform

The easy to use and low cost internet based trading platform Climex offers spot trading and clearing in EU Allowances and CERs. The Climex platform provides anonymous matching and broad and transparent price discovery between buyers and sellers from around the globe. APX B.V. is the central clearing counterparty. Weekly Climex trade statistics are published online at www.climex.com. Continuous trade figures can be found on Reuters Interactive.

Climex Auction Platform

The Climex Auction Platform has been built especially to auction Carbon Credits. These can be European Allowances (EUAs), Certified Emission Reductions (CERs), Emission Reduction Units (ERUs), Secondary CERs or Verified Emission Reductions. Both buyers and sellers can organize auctions. Even investment needs can be put on the platform. For upcoming auction dates, please visit www.climex.com or contact our Customer Service Desk.

Climex Energy Contracting

Climex Energy Contracting helps large consumers of energy to optimise their energy purchasing for electricity, gas and Guaranties of Origin/Renewable Energy Certificates. Climex is specialised in helping parties who need to engage in a European Tender Procedure. We have designed an efficient process, which ends with an electronic auction, guaranteeing real-time competition, objectivity, full transparency, best price and enormous time savings. Climex Energy Contracting offers specialised service, support and advice and profound experience with European Tender Procedures.

About Climex

Climex, founded in 2003 and based in The Netherlands, is backed by a network of distribution partners all over Europe in order to provide easy access to all sorts and conditions of participants. Climex' shareholders are Rabobank and TenneT, who started Climex on request of a group of industries who wanted an efficient, low cost and transparent way to trade among each other without being dependent on other parties. The Climex Community (www.climex.com/community) is a central resource for the entire industry to keep informed and share ideas on everything related to emissions trading and energy contracting.

Climex Distribution partners:

- APX Group B.V.
- ÖEKV (based in Austria)
- Sendeco2
- STX Services (based in The Netherlands)
- Vertis Environmental Finance (based in Hungary)

Climex advantages:

- A trusted global spot and auction market
- Commercially proven secure online market place
- Payment & delivery included for spot trading
- A large diversity of market participants
- Easy to use & anonymous
- No fees until you receive results

Climex Spot Trading Fees*

For EUA and CER Spot trading, Climex charges no annual fees, only use-related fees. The trading fees are:

- Trades up to 100.000 tonnes per calendar year
5 Euro ct per tonne.
- Trades from 100.000 tonnes up to 250.000 tonnes per calendar year
3 Euro ct per tonne.
- Trades of 250.000 tonnes and more per calendar year
1 Euro ct per tonne.

For larger traders special large volume fees exist and for regular traders there is the possibility to become a Liquidity Provider and trade at discounted rates.

* Fees are excluding VAT.

Carbon Emission Rights Auction Fees*

Use-related fees for participants in the Carbon Emission Rights Auctions are as a rule 1,75% of the transacted amount. This means you only pay a fee when you have successfully transacted what you were looking for. The use-related fees for the auctioneer are dependent on the volumes offered and the auction design. For large quantities, customised agreements are possible.

* Fees are excluding VAT.
